

## 3/32" 21 Gauge Steel

|                                      |                      |
|--------------------------------------|----------------------|
| Wire Material:                       | ASTM A510            |
| Finish:                              | Natural, Sprayed     |
| Wire Diameter:                       | 0.0320 in.           |
| Tensile Strength:                    | 120 ksi - 130 ksi    |
| Coil Outside Diameter (Panel Depth): | 0.198 in.            |
| Coil Inside Diameter:                | 0.133 in.            |
| Pitch (Loops per foot):              | 0.218 in. (55.0 Lpf) |
| Percentage Open Area:                | 66.2%                |
| Weight:                              | 0.59 lbs/sqft        |
| Aperture Width:                      | 0.200 in.            |
| Aperture Height:                     | 0.137 in.            |
| Aperture Diameter:                   | 0.123 in.            |
| Maximum Panel Height (Coil Length):  | 40 ft.               |
| Maximum Panel Width:                 | Unlimited            |
